

IDEA Student Ratings of Instruction Report Messages Number of Responses and Response Rate

Text for Report, page 1:

There were **[insert number from FIF]** students enrolled in the course and **[insert number of surveys]** students responded. Your results are considered **[insert from Table A]**. The **[calculate]**% response rate indicates that results **[insert from Table B]** of the class as a whole.

Table A

One of the following messages will appear on Page 1 of the IDEA Report based on the number of responses:

<10	unreliable because the number responding is so small
10-14	only marginally reliable
15-24	fairly reliable
25-39	reliable
>39	highly reliable

Table B

One of the following messages will always appear based on the percentage of students responding:

<50%	are inadequate to assure representativeness
50-64%	may not be representative
65-74%	are probably representative
75%+	are representative
